## Health IT Mentorship Program

MeHI's Health IT Mentorship Program will pair professionals currently working in the Health IT field with students looking to enter the Health IT workforce. The program is scheduled to launch Fall 2024.

### Program Highlights

- » 3-month program starting Fall 2024
- » Mentors and mentees will be paired based on shared interests
- » Mentors and mentees will meet for at least 1 hour every two weeks
- » Mentees will have the opportunity to virtually network and support one another
- » Mentees will work on a Health IT focused project with the guidance of their mentor
- » Program will culminate in a virtual Project Showcase

### Mentee Profile

- » First or second year students currently enrolled in an associates degree program at a Massachusetts Community College
- » Students enrolled in Health IT, IT or Health Programs
- » Strong interest in entering the Health IT workforce
- » Students from diverse backgrounds are strongly encouraged to apply

### Mentor Profile

- » Health IT professional with more than 5 years' experience
- » Preference for mentors at Massachusetts Community Health Centers
- » Available to meet with a student virtually for 10 hours over 3 months
- » Able to help a student design and complete a Health IT related project
